## Easton Wheels

Easton Wheels

**EA 70 X**  
**\$524.99**

A workhorse performance wheel if ever there were, the EA70 X tubular plays a supporting role for our sponsored professionals and hard driving racers of all stripes. From a pothole filled training ride to an unforgiving Spring Classic or sloppy cross race, [\[Product Details...\]](#)

**EA50 AERO**  
**\$399.99**

An update to our most popular wheel; the EA50 Aero now features a slippery 30mm aluminum rim, widely bladed stainless steel spokes and a completely revised (and red) hubset. Because each EA50 wheelset is 100% hand laced and trued, theyâ€™re certain to last [\[Product Details...\]](#)

**EA70**  
**\$549.99**

The wheel that put Easton on the map for dependability, the EA70 delivers phenomenal performance across the entire spectrum of road and cross riding. A proven 28-mm deep rim, Sapim double butted spokes and a blend of alloy and brass nipples make the EA70 [\[Product Details...\]](#)

**EA90 AERO**  
**\$799.99**

Designed for high performance riding and racing on flat to rolling roads, the EA90 Aero has a 28mm deep front rim and 31-mm deep rear for the right balance of aerodynamics and dependable handling. Easton Gen4 aluminum rims with machined brake track provid [\[Product Details...\]](#)

**EA90 SL**  
**\$699.99**

A workhorse training wheel and racing that has a bit of added durability over our featherweight SLX wheel thanks to a handful of additional spokes (24-front and 28-rear on the SL vs. 18-front and 24-rear on the SLX). Exclusive Gen 4 rim design and diff [\[Product Details...\]](#)

**EA90 SLX**  
**\$999.99**

Years of obsessive refinement and careful engineering has resulted in our lightest aluminum wheelset ever. At just 1398-grams the EA90 SLX is perfect for any ride or race that features significant changes in elevation. Despite its low mass, this featherweight [\[Product Details...\]](#)

**EA90 TT Front**  
**\$399.99**

EVERYONE Designed for time trial or triathlon, training and racing, the EA90 TT allows anyone to ride faster without any additional effort thanks to the an intelligent front hub that reduces frontal exposure to the wind by as much as 50%. Gen4 31mm deep rim [\[Product Details...\]](#)

**EC90 AERO 56 Clincher**  
**\$1 999.99**

It took Easton composites design, engineering and testing to create the first no compromises carbon road clincher that also features wind cheating aerodynamics. The EC90Aero offers braking performance and durability on par with traditional aluminum clincher [\[Product Details...\]](#)

**EC90 EARO 56**  
**\$1 999.99**

Proprietary 56-mm deep Easton rims and a low spoke count (18-front; 20-rear) help to make the EC90 Aero a favorite wheelset for flat to rolling road races and time trials. The EC90 Aero rims are deep enough to provide a significant, wind cheating advantage [\[Product Details...\]](#)

**EC90 SL 38 Tubular**  
**\$1 999.99**

Strong enough to handle Spring Classics like Het Volk and light enough to make appearances in the mountain stages of the Grand Tours, the EC90 SL is the one race wheelset to have if you can have just one. Thanks to a 38mm deep rim and a low spoke count, t [\[Product Details...\]](#)

**EC90 SL 38mm CLINCHER**  
**\$1 999.99**

It took Easton composites design, engineering and testing to create the first no compromises carbon road clincher. The EC90SLc offers braking performance and durability on par with traditional aluminum clincher wheels, but with the reduced weight and enha [\[Product Details...\]](#)

**EC90 SLX**  
**\$1 999.99**

Developed as the ultimate low weight wheel for Eastonâ€™s sponsored athletes, the EC90 SLX is a sub-1200 gram carbon wheelset prized for amazing climbing legs and smooth, dependable braking surface. Look for Easton sponsored professionals including Elite Wo [\[Product Details...\]](#)

**EC90 TKO**  
**\$1 799.99**

One of the few wheelsets that has been designed from the ground up for high-performance riding and racing on the track, the EC90 TKO Carbon is possibly the stiffest, strongest, fastest spoked pista wheelsets available. Custom designed and fabricated 56mm [\[Product Details...\]](#)

**EC90 TT 56mm Front**  
**\$799.99**

Our work with all kinds of road cyclists (including some of the best triathlete and time trial riders in the world) told us pretty clearly that many favored an aero wheel with a slightly lower profile for windy conditions or highly technical courses. Afte [\[Product Details...\]](#)

**EC90 TT 90mm**  
**\$2 199.99**

The result of our drive to create the fastest wheel possible for our sponsored road and triathlon racers. Years of engineering experience and repeated sessions at San Diego's Low Speed Wind Tunnel have helped us create a wheelset that weighs just 1424-gra [\[Product Details...\]](#)
